

Looking for aeronautical internship

Methodical

Team Spirit

Leadership

Autonomy

As an engineering student at ENAC, I am seeking a first-year internship in the aeronautical or industrial sector to gain insight into the workings of technical systems and demanding engineering environments.

My academic and personal experiences have allowed me to develop rigor, adaptability, and initiative. As a football referee and former judoka, I have strengthened my sense of responsibility, stress management skills, and ability to work effectively in a team.

I am eager to apply my skills to a internship in the field of aeronautical systems, contributing to innovative projects while continuing to learn in a challenging environment.
